

COMPANY PROFILE

Knauf Gypsum (Thailand) Limited

THE KNAUF GROUP

Knauf, a family name, and a corporate group of global dimensions. At the same time synonymous with a type of corporate culture which has become rare.

Knauf is a typical family firm in spite of its size and this is precisely the reason for its amazing success. It is the short and direct decision-making paths, the courage to tackle new ideas, innovations, investments and the wealth of ideas contributed by all Knauf employees that characterises the company.

Knauf was founded in 1932 by the brothers Karl and Dr. Alfons N. Knauf. Today their sons, managing partners Baldwin and Nikolaus Knauf, steer the success of the corporations' numerous enterprises in close co-ordination with the other family members.

From its beginnings in gypsum processing along the Saar and Main rivers, Knauf has expanded and diversified to become a corporation with worldwide activities, delivering products and services in the following fields:

- › Building materials and systems based on gypsum and gypsum-related products
- › Thermal insulating and sound insulation materials
- › Limestone and lime products
- › Chalk and cement related products
- › Plant engineering

Mr. Alexander Knauf and Mr. Manfred Grundke

Currently, the management of the Knauf Group is in the hands of Manfred Grundke and Alexander Knauf, who are also personally liable general partners. Knauf: A group of companies with a long history. Great success. Poised for the challenges of the future

For further information on the Knauf Group worldwide, please visit our website at www.knauf.com.

Knauf Headquarters Germany

KNAUF GROUP WORLDWIDE

Knauf is a provider of complete lightweight construction systems internationally. Its diverse range of products include plasterboard, mineral fiber tiles, acoustic boards, plasters for internal and external applications; and glass wool and rock wool mineral wool insulation. With 150 production facilities and sales organizations in over 60 countries, 26,000 employees worldwide, and sales of 7 billion Euro (in 2015), the Knauf Group is without doubt one of the world's leading companies – in Europe, the USA, South America, Russia, Africa, Australia and Asia.

A quality range of products and systems designed for performance provide solutions for fire, moisture, impact, acoustic and decorative applications for all construction projects – commercial and residential. Knauf's innovative lightweight construction systems include gypsum board, metal systems for walls and ceilings, acoustic and air cleaning wall & ceiling linings and ceiling tiles

KNAUF THAILAND

The successful development of the Thailand business started in 2013 with the construction of our gypsum plant in Saraburi. To date, in excess of THB800 million has been invested in the most advanced German manufacturing technology making Knauf one of the best gypsum board quality in Thailand and South East Asia.

Knauf is firmly committed to on-going technology development and diversification, working closely with the industry to deliver quality, innovative, cost-effective products to our customers. Knauf systems have been used and installed around the world with proven success. In Thailand, products have the quality assurance of the Company's TIS 219-2552 and TIS 863-2532 certification.

We are not only working to continually improve the quality of current products and services, but constantly monitoring and evaluating trends for new materials, technologies and systems. In this way we can identify and develop each new opportunity to maintain our leading edge position.

Vision

- > for gypsum-based products and systems
- > for energy-efficient insulation materials
